

Course organization (2019-2020)

FH: François Hache
 IZ: Isabelle Zaquine
 MCSK: Marie-Claire Schanne-Klein

Date	Lecture	Practice	Profs
11/9	Introduction – NL susceptibilities	Anharmonic oscillator	FH/MCSK
18/9	Propagation equation – Energy transfers	<ul style="list-style-type: none"> Tensor symmetry Anisotropic optics 	FH/IZ or MCSK
25/9	2 nd order nonlinearity	OR OPO thresholds	IZ/MCSK
02/10		Second harmonic intensity	IZ
09/10	Quantum calculation of nonlinear susceptibilities	Nonresonant $\chi^{(2)}$ in a two-level system	FH/MCSK
16/10	Time-resolved spectroscopy (theory)		FH
23/10	Parametric fluorescence	Resonant Raman <i>vs</i> fluorescence	IZ/MCSK
Toussaint	QCM		
06/11	3 rd order nonlinearity: optical Kerr effect	Third harmonic generation in focussed regime	FH/MCSK
13/11	Ultrashort pulses		FH
20/11		Phase conjugation – Two-photon absorption	IZ
27/11	Raman diffusion		FH
4/12	Final examination
